

At the National Geospatial-Intelligence Agency, we are committed to strengthening the nation through our command of geospatial intelligence. A new campus, which is planned to be built in the St. Louis metropolitan area by 2025, is vital to ensuring our long-term mission success. The new campus provides an opportunity to strengthen the framework for NGA's long-standing relationship with the St. Louis region.

PLANS FOR THE NEW CAMPUS INCLUDE:

- A purpose-built approximately 700,000 gross square-foot main building
- Employee-focused amenities; a modern cafeteria, fitness center, meeting spaces and quiet areas
- Collaborative, flexible and open spaces
- Innovative and education spaces
- Windows offering natural light
- Modern technology to support future generations of GEOINT
- Increased teleconference and conferencing spaces
- A green campus with grass, trees, and walking paths
- Garage parking
- An energy efficient healthy and sustainable building
